Our Shared Future Taking Shape in Manhattanville

Columbia’s West Harlem campus will be a hub of学术 and civic life, a place where world-class centers of teaching, research and learning will be connected with vibrancy. The development of the Manhattanville campus has been imagined as a way to create a new, dynamic urban neighborhood.

**An Academic Campus Built for Urban Life**

- The Greene Science Center: Designed by Renzo Piano Building Workshop with Carlo Ratti, the building will house a variety of research and teaching facilities, including a new architectural program that will enable students to work closely with faculty.
- The Solar Center: This new building will house Columbia’s solar research institute, providing state-of-the-art facilities for research and teaching in renewable energy.
- The Studebaker Building: Once the site of an auto-manufacturing facility, the building has been transformed into a modern research facility.

**Investing in Local Opportunity**

- New STEM Education: Columbia is investing $20 million to create a new STEM education center in Harlem, offering academic and career opportunities for local residents.
- Community Development: Columbia is investing $76 million to support community development in the Harlem area.

**A Green and Welcoming Campus**

- Green Roofs: The campus will feature extensive green roofs, reducing energy consumption and improving air quality.
- Pedestrian-Friendly Streets: Broad avenues and sidewalks will be designed to encourage pedestrian traffic.
- Public Art: The campus will be adorned with public art installations, creating a vibrant and welcoming environment.

**Building Community**

- Community Engagement: Columbia is committed to building strong partnerships with the local community, ensuring that the campus will be a place where people of all backgrounds can thrive.
- Economic Development: The campus will be a hub of economic development, with new businesses and job opportunities.

**Innovative Facilities**

- The France Institute: This new building will house the French Institute, providing a new venue for cultural and academic activities.
- The University Forum: A multi-purpose venue, designed by Renzo Piano Building Workshop with Public Architecture, will serve as a hub for community events.
- The Studebaker Building: This historic building will be transformed into a modern research facility.

**Conclusion**

Columbia’s West Harlem campus will be a hub of academic and civic life, offering opportunities for all members of the community. Through its commitment to community engagement and economic development, Columbia is building a new urban neighborhood that will be a beacon of innovation and opportunity.
